

## **IDENTIFYING FORCES**

### **KEY IDEAS**

- Forces are invisible
- Forces have effects
- There are different types of forces

### **EXAMPLE QUESTIONS**

- Can you see a force?
- What different types of forces can you think of?
- What different things can forces do?

### **FORCES ARE INVISIBLE**

- We cannot actually see a force; we can see only the effects or results of a force.

### **DIFFERENT TYPES OF FORCES**

- There are many types of forces such as electrical, magnetic or gravitational.

### **EFFECTS OF FORCES**

- Forces can do different things, such as:
- Cause an object to start moving
- Cause an object to go faster
- Cause an object to go slower
- Cause an object to change direction
- Cause an object to stay still
